Subject index

A

Acetylcholine in bronchial asthma after long-term treatment with gold salt, bronchial responsiveness to (Muranaka M et al), 350
Acrylates, UV-cured, contact allergy caused by, 18 (Abst.)
Adjuvant, immunologic, lithium as, 22 (Abst.)
Adrenergic, beta, blockade, effects on histamine and prostaglandin-$F_{2\alpha}$ responsiveness in dog (Snapper JR et al), 199
  beta 2 receptors, autoantibodies to; possible cause of adrenergic hyporesponsiveness in allergic rhinitis and asthma, 9 (Abst.)
  hyporesponsiveness in allergic rhinitis and asthma; autoantibodies to beta 2-adrenergic receptors as possible cause, 9 (Abst.)
Agarose, monocyte chemotaxis under; defects in atopic disease, aspirin therapy, and mucocutaneous candidiasis, 29 (Abst.)
Airway(s) of healthy male subjects with and without induced bronchoconstriction, effects of ascorbic acid and indomethacin on (Ogilvy CS et al), 363
  hyperreactivity and bronchial mucosal permeability (Hogg JC), 421 (Postgraduate course presentation)
  reactivity, methacholine, effect of inhaled corticosteroid on (Easton JG), 388
  regulation of fluid and mucous secretions in (Nadel JA), 417 (Postgraduate course presentation)
  response(s) to antigen challenges in allergic rhinitis and allergic asthma (Ahmed T et al), 135
    to histamine in asymptomatic long-term marijuana smokers (Hernandez MJ et al), 153
    to hyperpnea and cold air in asthma, effects of cromolyn sodium on, 27 (Abst.)
Allergen(s), dog and cat; urinary proteins or dander proteins, 12 (Abst.)
  flour, inhaled, hypersensitivity to; cereals compared, 27 (Abst.)
  and histamine-induced skin tests, correlation of serum theophylline levels with inhibition of, 26 (Abst.)
  known, kinetics of release in relation to biologic activity (Marsh DG et al), 206
Allergen—Cont'd
  mixture, complex (yellow jacket venom), comparison of radioimmunoprecipitation and solid-phase radioimmunoassay techniques for measurement of IgG specific for; quantitation of antigen-specific IgG in human serum (Hamilton RG, Adkinson NF Jr), 14
  modified, inhibition of murine reaginic antibody responses by nasal immunotherapy with, 30 (Abst.)
  peanut, isolation and partial characterization of (Sachs MI et al), 27
  pollen, Russian thistle *(Salsola pestifer)*, isolation and characterization of (Shafiee A et al), 472
  ragweed Ra3, two variants of (Goodfriend L et al), 299
  rapidly released from short ragweed pollen. I. Kinetics of release of known allergens in relation to biologic activity (Marsh DG et al), 206; II. Identification and partial purification (Hussain R et al), 217
  sesame seed, anaphylaxis to (Malish D et al), 35
  -tested and normal skin, skin-blister fluid from, induction of late cutaneous reactions by (Dorsch W and Ring J), 117
Allergic asthma and allergic rhinitis, airway responses to antigen challenge in (Ahmed T et al), 135
  bronchopulmonary aspergillosis, development during treatment of severe asthma with systemic corticosteroids (Clayton DE and Busse WW), 243
  emergency, Hymenoptera, factitious; report of new variant of Munchausen's syndrome (Hendrix S et al), 8
  hyposensitization treatment, onset of polyarteritis nodosa during, 15 (Abst.)
  reactions to enzymes used in plant cloning experiments (Ransom JH and Schuster M), 412 (Brief communication)
  rhinitis and allergic asthma, airway response to antigen challenge in (Ahmed T et al), 135
    and asthma, adrenergic hyporesponsiveness in; autoantibodies to beta 2-adrenergic receptors as possible cause, 9 (Abst.)
    pharmacologic prophylaxis of; relative efficacy of hydroxyzine and chlorpheniramine (Wong L et al), 223
    problems in examination of nasal smears in, 25 (Abst.)
  subjects, differential effects of methacholine and antigen challenge on gas exchange in (Oligiati et al), 325
Allergy, American Academy of: *see* American Academy of Allergy and bruxism, relationship between, in patients with myofascial pain-dysfunction syndrome, 3 (Abst.)
  contact, caused by UV-cured acrylates, 18 (Abst.)

January, pp. 1-86; February, pp. 87-166; March, pp. 167-250; April, pp. 251-332; May, pp. 333-416; June, pp. 417-514.
Abstracts: January, pp. 1-4; February, pp. 5-8; March, pp. 9-14; April, pp. 15-20; May, pp. 21-26; June, pp. 27-32.

Allergy—Cont'd
extracts, potency of, effect of preservatives and conditions of storage on (Nelson HS), 64
food, delayed onset (Golbert TM), 496; Reply (Frick OL et al), 496 (Correspondence)
generalized, to porcine and bovine monocomponent insulins, 5 (Abst.)
insulin, chronic urticaria secondary to, 6 (Abst.)
metal, and surgical patient, 6 (Abst.)
to millet seeds (Parker JL et al), 78 (Brief communication)
miscellaneous, 2, 5, 12, 18, 23, 30 (Absts.)
seasonal, performance in students with, 21 (Abst.)
Alopecia areata, antigenic competition as therapeutic concept for, 17 (Abst.)
Alveolar macrophages of slow-reacting substance of anaphylaxis released from pig lung cells, inactivation by (Paterson NAM and Craig ID), 435
American Academy of Allergy, abstracts given at annual meeting, 1 (Suppl.)
statement on resuscitative equipment, 1
statement on controversial techniques, 333
Ammonia (as an irritant), priming of nasal mucosa by, or by ragweed extract (Bacon JR et al), 111
Anaemia, idiopathic warm autoimmune haemolytic, human leucocyte antigens A, B, C, and DRW in, 22 (Abst.)
Anaphylaxis after ingestion of millet seeds (Parker JL et al), 78 (Brief communication)
sesame seed ingestion (Malish D et al), 35
locally induced intestinal, effect on uptake of a bystander antigen (Bloch KJ and Walker WA), 312
Angioedema/heat urticaria, local; evidence for histamine release without complement activation (Grant JA et al), 75
Antibody(ies), anti-sperm, in infertile women, local production of, 10 (Abst.)
California house dust IgE, in sera of allergic Nigerian patients, 18 (Abst.)
IgE and IgG4 and complement in diagnosis of atopic diseases, 5 (Abst.)
ragweed specific, in patients undergoing immunotherapy; comparison of radioallergosorbent test and solid-phase radioimmunoassay (Zeiss CR et al), 105
in workers sensitive to toluene diisocyanate, antigens that detect, 24 (Abst.)
monoclonal, enumeration of T-cell subsets in atopic dermatitis using (Leung DYM et al), 450
regulation, auto-anti-idiotypic, loss of immune competence with age due to, 30 (Abst.)
responses, IgE and IgG, human, to minor ragweed allergen Ra3; correlation with skin tests and with other allergens (Platts-Mills TAE et al), 129
murine reaginic, inhibition by nasal immunotherapy with modified allergen, 30 (Abst.)
to rheumatoid nuclear antigen; relationship to in vivo Epstein-Barr virus infection, 11 (Abst.)
and tests correlated in study of atopic asthma (Miyamoto T et al), 279
Antigen(s) A, B, C, and DRW, human leucocyte, in idiopathic warm autoimmune haemolytic anaemia, 22 (Abst.)
Ascaris, in rhesus and cynomolgus monkeys, respiratory responses to (O'Neil RM and Goodman FR), 229
bystander, effect of locally induced intestinal anaphylaxis on (Bloch KJ and Walker WA), 312
challenge, airway responses in allergic rhinitis and allergic asthma (Ahmed T et al), 135
detecting IgE antibodies in workers sensitive to toluene diisocyanate, 24 (Abst.)
and exercise-induced asthma, pathways of; antigen provocation in patients rendered refractory to exercise-induced asthma (Weiler-Ravell D and Godfrey S), 391
Hymenoptera, whole body, as compared with venom, skin-test reactivity of human volunteers to, multicenter study on (Schwartz HJ et al), 81 (Committee report)
Antigen—Cont'd
-induced, IgE-mediated monkey asthma and skin reactions, inhibition by 5,8,11,14-eicosatetraynoic acid (Patterson R and Harris KE), 146
and methacholine challenge, differential effects on gas exchange in allergic subjects (Oligiati et al), 325
polymerized, for immunotherapy, further studies on safety of (Hendrix SG et al), 124
provocation in patients rendered refractory to exercise-induced asthma; pathways of exercise- and antigen-induced asthma (Weiler-Ravell D and Godfrey S), 391
relationships, fungal, approach by radioallergosorbent test inhibition (Karr RM et al), 194
rheumatoid nuclear, antibody to; relationship to in vivo Epstein-Barr virus infection, 11 (Abst.)
soluble and particulate, cell-mediated immunity to, 29 (Abst.)
-specific IgG in human serum, quantitation of; comparison of radioimmunoprecipitation and solid-phase radioimmunoassay techniques for measurement of IgG specific for complex allergen mixture (yellow jacket venom) (Hamilton RG, Adkinson NF Jr), 14
synthetic medium, of *Micropolyspora faeni* and *Thermoactinomyces candidus*, characterization of (Treuhaft MW et al), 375
tree pollen, polymerized (Patterson R et al), 162 (Brief communication)
Antigenic competition as therapeutic concept for alopecia areata, 17 (Abst.)
Antihistamines, H_1 and H_2, comparison of actions on histamine-induced bronchoconstriction and cutaneous wheal response in asthmatic patients (Nathan RA et al), 171
Anti-inflammatory–analgesic drugs, nonsteroidal, and cutaneous tests for immediate hypersensitivity (Simon RA et al), 247 (Correspondence)
Anti-sperm antibodies in infertile women, local production of, 10 (Abst.)
Arachidonic acid, cyclo-oxygenase and lipoxygenase metabolism of, blocked by agent that releases basophil and mast cell histamine; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444
Ascaris antigen in rhesus and cynomolgus monkeys, respiratory responses to (O'Neil RM and Goodman FR), 229
Ascorbate, effects of increasing weekly doses of, on certain cellular and humoral immune functions in normal volunteers, 2 (Abst.)
Ascorbic acid and indomethacin, effects on airways of healthy male subjects with and without induced bronchoconstriction (Ogilvy CS et al), 363
in prevention of chromium dermatitis, 4 (Abst.)
Aspergillosis, allergic bronchopulmonary, development during treatment of severe asthma with systemic corticosteroids (Clayton DE and Busse WW), 243
Aspirin therapy, atopic disease, and mucocutaneous candidiasis, defects in; monocyte chemotaxis under agarose, 29 (Abst.)
Asthma, acute, in children, radiological assessment of severity, 13 (Abst.)
allergic, and allergic rhinitis, airway responses to antigen challenge in (Ahmed T et al), 135
and allergic rhinitis, adrenergic hyporesponsiveness in; autoantibodies to beta 2-adrenergic receptors as possible cause, 9 (Abst.)
atopic, correlation among various tests and antibodies (Miyamoto T et al), 279
bronchial, effect of theophylline on cortisol secretion in treatment of (Tulin-Silver J et al), 45
iodides in (Tuft L), 497 (Correspondence)
responsiveness to acetylcholine after long-term treatment with gold salt (Muranaka M et al), 350
chronic, clinical trial of combined cromolyn/beclomethasone treatment for (Toogood JH et al), 317

Asthma—Cont'd
effects of cromolyn sodium on airway response to hyperpnea and cold air in, 27 (Abst.)
exercise- and antigen-induced, pathways of; antigen provocation in patients rendered refractory to exercise-induced asthma (Weiler-Ravell D and Godfrey S), 391
-induced, antigen provocation in patients rendered refractory to; pathways of exercise- and antigen-induced asthma (Weiler-Ravell D and Godfrey S), 391
evaluation of role played by mediators of immediate hypersensitivity in, 21 (Abst.)
genetic basis of sex differences in the prevalence of, 5 (Abst.)
granulocyte response to phosphodiesterase inhibitor RO 20-1724 in (Busse WW, Anderson CL), 70
and hay fever, 5, 9, 15, 21, 27 (Absts.)
hemodialysis-associated, in renal failure, 16 (Abst.)
IgE-mediated, inhibition in rhesus monkeys by agent that releases basophil and mast cell histamine but blocks cyclo-oxygenase and lipoxygenase metabolism of arachidonic acid (Patterson R et al), 444
infantile bronchial (Tabachnik E and Levison H), 339 (Postgraduate course presentation)
and parental overprotection, 4 (Abst.)
in pregnancy, 9 (Abst.)
severe, in children 9-14 years old, neuropsychological correlates of, 12 (Abst.)
development of allergic bronchopulmonary aspergillosis during treatment with corticosteroids (Clayton DE and Busse WW), 243
and skin reactions, monkey, IgE-mediated, antigen-induced, inhibition by 5,8,11,14-eicosatetraynoic acid (Patterson R and Harris KE), 146
treatment (VanArsdel PP), 348 (Editorial)
ongoing, use of peak expiratory flow rate in, 24 (Abst.)
Asthmatic children, steroid-dependent, prednisolone disposition in (Rose JQ et al), 188
non-atopic, non-aspirin sensitive, severe bronchial reaction and cardiopulmonary arrest following intravenous injection of hydrocortisone, 12 (Abst.)
and normal subjects, effects of infused histamine on; skin test responses compared (Summers R et al), 456
patients, comparison of actions of H_1 and H_2 antihistamines on histamine-induced bronchoconstriction and cutaneous wheal response in (Nathan RA et al), 171
metabolism of ^{14}C-histamine given intrabronchially to, 16 (Abst.)
prostaglandin-like substances in urine of, 8 (Abst.)
repeated histamine inhalation tests in (Ruffin RE et al), 285
subjects, passive exposure to cigarette smoke, 15 (Abst.)
Atopic dermatitis, enumeration of T-cell subsets using monoclonal antibodies (Leung DYM et al), 450
disease(s), aspirin therapy, and mucocutaneous candidiasis, defects in; monocyte chemotaxis under agarose, 29 (Abst.)
complement, IgE and IgG4 antibodies in diagnosis of, 5 (Abst.)
immunogenetics of (Marsh DG and Meyers DA), 247; Reply (Blumenthal MN et al), 248 (Correspondence)
screening for, 19 (Abst.)
Autoantibodies to beta 2-adrenergic receptors; possible cause of adrenergic hyporesponsiveness in allergic rhinitis and asthma, 9 (Abst.)
Autoimmune haemolytic anaemia, idiopathic warm, human leucocyte antigens A, B, C, and DRW in, 22 (Abst.)

B

Basophil and mast cell histamine release by agent that blocks cyclo-oxygenase and lipoxygenase metabolism of arachidonic acid; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444
Beclomethasone/cromolyn, combined treatment for chronic asthma, clinical trial of (Toogood JH et al), 317
Bee sting hypersensitivity, immunotherapy in, 19 (Abst.)
Beta adrenergic blockade, effects on histamine and prostaglandin-$F_{2\alpha}$ responsiveness in dog (Snapper et al), 199
2-adrenergic receptors, autoantibodies to; possible cause of adrenergic hyporesponsiveness in allergic rhinitis and asthma, 9 (Abst.)
Birch pollen extract, humoral and cell-mediated immune responses to fractions of, 18 (Abst.)
Black spot test for poison ivy and related species, 31 (Abst.)
Bovine and porcine monocomponent insulins, generalised allergy to, 5 (Abst.)
Bronchial asthma, acute, associated with poliomyelitis-like illness (Hopkin's syndrome), immunological abnormalities in, 7 (Abst.)
infantile (Tabachnik E and Levison H), 339 (Postgraduate course presentation)
iodides in (Tuft L), 498 (Correspondence)
responsiveness to acetylcholine after long-term treatment with gold salt (Muranaka M et al), 350
carcinoma, elevated serum IgE in (Hällgren R et al), 398
hyperreactivity to methacholine in farmers' lung disease (Freedman PM, Ault B), 59
mucosal permeability and airways hyperreactivity (Hogg JC), 421 (Postgraduate course presentation)
reaction, severe, and cardiopulmonary arrest following intravenous injection of hydrocortisone in a non-atopic, non-aspirin sensitive asthmatic, 12 (Abst.)
responsiveness to acetylcholine in bronchial asthma after long-term treatment with gold salt (Muranaka M et al), 350
Bronchoconstriction, acute, caused by Beclovent and not Vanceril, 6 (Abst.)
allergic, impaired tracheal mucus transport in; effect of terbutaline pretreatment (Weissberger et al), 357
histamine-induced, and cutaneous wheal response in asthmatic patients, comparison of actions of H_1 and H_2 antihistamines on (Nathan RA et al), 171
induced, effects of ascorbic acid and indomethacin on airways of healthy male subjects with (Ogilvy CS et al), 373
Bronchodilator, aerosol, use of 20-isopropylidene PGE_2 as, 14 (Abst.)
Bronchopulmonary aspergillosis, allergic, development during treatment of severe asthma with systemic corticosteroids (Clayton DE and Busse WW), 243
Brown lung and lung cancer in textile workers; exposure to cotton dust and respiratory disease, 23 (Abst.)
Bruxism and allergy, relationship between, in patients with myofascial pain-dysfunction syndrome, 3 (Abst.)

C

cAMP; *see* Cyclic adenosine monophosphate
Candidiasis, mucocutaneous, aspirin therapy, and atopic disease, defects in; monocyte chemotaxis under agarose, 29 (Abst.)
Carcinoma, bronchial, elevated serum IgE in (Hällgren R et al), 398
Cardiopulmonary arrest and severe bronchial reaction following intravenous injection of hydrocortisone in a non-atopic, non-aspirin sensitive asthmatic, 12 (Abst.)
Cat and dog allergens; urinary proteins or dander proteins, 12 (Abst.)
Celiac disease, variable levels of IgA in, 11 (Abst.)
Cell-mediated immunity and in vitro effect of thymic humoral factor on blood lymphocytes of children with atopic dermatitis, 3 (Abst.)
to soluble and particulate antigens, 29 (Abst.)
Cellular and humoral immune functions, effects of increasing weekly doses of ascorbate on, in normal volunteers, 2 (Abst.)
Cereals compared in hypersensitivity to inhaled flour allergens, 27 (Abst.)

Chemotaxis, monocyte, under agarose; defects in atopic disease, aspirin therapy, and mucocutaneous candidiasis, 29 (Abst.)
and in vitro lymphocyte stimulation; tetanus toxoid skin test in children, 28 (Abst.)
Children with culture positive for *Mycobacterium tuberculosis*, persistently negative tuberculin reaction among (tuberculin negative tuberculosis), 7 (Abst.)
neuropsychological correlates of severe asthma in, 12 (Abst.)
radiological assessment of severity of acute asthma in, 13 (Abst.)
steroid-dependent, asthmatic, prednisolone disposition in (Rose JQ et al), 188
1-Chloro-2, 4-dinitrobenzene contact sensitivity and other T lymphocyte functions in myasthenia gravis, effects of adult thymectomy on development of, 23 (Abst.)
Chlorpheniramine and hydroxizine, relative efficacy of; pharmacologic prophylaxis of allergic rhinitis (Wong L et al), 223
Chromium dermatitis, ascorbic acid in prevention of, 4 (Abst.)
Cigarette smoke, passive exposure of asthmatic subjects to, 15 (Abst.)
Cimetidine, effect on delayed hypersensitivity, 31 (Abst.)
Circadian rhythm of nasal secretory IgA; single-dose suppression test, 13 (Abst.)
Complement activation, histamine release without, evidence for; local heat urticaria/angioedema (Grant JA et al), 75
IgE, and IgG4 antibodies in diagnosis of atopic diseases, 5 (Abst.)
Complement-1 inhibitor levels in migraineurs and normals, 32 (Abst.)
Contrast media studies, radiographic, pretreatment of high-risk patients requiring (Greenberger PA et al), 185
Corticosteroid(s) and histamine, inhibitory effects of, on human lymphocytes (Wang SR, Zweiman B), 39
inhaled, effect on methacholine airway reactivity (Easton JG), 388
systemic, development of allergic bronchopulmonary aspergillosis during treatment of severe asthma with (Clayton DE and Busse WW), 243
Cortisol protection of granulocyte response to isoproterenol during in vitro influenza virus incubation (Busse WW et al), 178
secretion, effect of theophylline on (Tulin-Silver J et al), 45
Cotton dust, exposure to, and respiratory disease; textile workers, brown lung, and lung cancer, 23 (Abst.)
Cromolyn/beclomethasone, combined treatment for chronic asthma, clinical trial of (Toogood JH et al), 317
sodium, effects on airway response to hyperpnea and cold air in asthma, 27 (Abst.)
Cutaneous reactions, late, induction by skin-blister fluid from allergen-tested and normal skin (Dorsch W and Ring J), 117
tests for immediate hypersensitivity and nonsteroidal anti-inflammatory–analgesic drugs (Simon RA et al), 247 (Correspondence)
Cyclic adenosine monophosphate, binding to soluble protein from tracheal smooth muscle, effect of theophylline on, 20 (Abst.)
in hypersensitivity reactions, 20 (Abst.)
Cyclo-oxygenase and lipoxygenase inhibitors; effect on release of slow-reacting substance of anaphylaxis from dispersed pig lung cells (Paterson NAM et al), 426
metabolism of arachidonic acid blocked by agent that releases basophil and mast cell histamine; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444

D

Depression and theophylline, 32 (Abst.)
Dermatitis, atopic, cell-mediated immunity and in vitro effects of thymic humoral factor on blood lymphocytes of children with, 3 (Abst.)
Dermatitis, atopic—Cont'd
enumeration of T-cell subsets using monoclonal antibodies (Leung DYM et al), 450
chromium, ascorbic acid in prevention of, 4 (Abst.)
Dermatomycoses, diagnosis of, simplified in vitro assay of delayed hypersensitivity in (Hunjan BS et al), 485
DiGeorge syndrome, thymosin therapy in, 1 (Abst.)
Dog and cat allergens; urinary proteins or dander proteins, 12 (Abst.)
effect of beta adrenergic blockade on histamine and prostaglandin-$F_{2\alpha}$ responsiveness in (Snapper JR et al), 199
Dose dependence of Hymenoptera venom immunotherapy (Golden DBK et al), 370

E

5,8,11,14-Eicosatetraynoic acid, inhibition of IgE-mediated, antigen-induced monkey asthma and skin reactions by (Patterson R and Harris KE), 146
Enteropathy, gluten-sensitive, 31 (Abst.)
Enzymes used in plant cloning experiments, allergic reactions to (Ransom JH and Schuster M), 412 (Brief communication)
Eosinophilia, nonallergic rhinitis with (NARES syndrome); clinical and immunologic presentation (Jacobs et al), 253
Epstein-Barr virus infection, in vivo; relationship of antibody to rheumatoid nuclear antigen to, 11 (Abst.)
Exercise- and antigen-induced asthma, pathways of; antigen provocation in patients rendered refractory to exercise-induced asthma (Weiler-Ravell D and Godfrey S), 391
Exercise-induced asthma, antigen provocation in patients rendered refractory to; pathways of exercise- and antigen-induced asthma (Weiler-Ravell D and Godfrey S), 391
evaluation of role played by mediators of immediate hypersensitivity in, 21 (Abst.)
Extracts, allergy, potency of, effect of preservatives and conditions of storage on (Nelson HS), 64

F

Farmers' lung disease, bronchial hyperreactivity to methacholine in (Freedman PM, Ault B), 59
skin testing in (Freedman PM et al), 51
Flour allergens, inhaled, hypersensitivity to; cereals compared, 27 (Abst.)
Fluid and mucous secretions in airways, regulation of (Nadel JA), 417 (Postgraduate course presentation)
Flunisolide nasal spray, short-term efficacy trial and 24-month follow-up of, in treatment of perennial rhinitis (Clayton DE et al), 2
Food allergen (peanut), isolation and partial characterization of (Sachs MI et al), 27
allergy; anaphylaxis after ingestion of millet seeds (Parker JL et al), 78 (Brief communication)
delayed onset (Golbert TM), 496; Reply (Frick OL et al), 496 (Correspondence)
Fraction A: D-glutamic acid: D-lysine polymer, short ragweed, immunotherapy in ragweed hay fever (Butterfield JH et al), 272

G

Gastric acid secretion in cold urticaria, 30 (Abst.)
Gastroesophageal reflux in normal adults, effect of theophylline on (Berquist WE et al), 407 (Brief communication)
Genetic basis of sex differences in the prevalence of asthma, 5 (Abst.)
Genetics of total IgE levels in humans, report on National Institute of Allergy and Infectious Diseases–sponsored workshop (Meyers DA and Marsh DG), 167 (Committee report)
Gluten-sensitive enteropathy, 31 (Abst.)
Gold salt, bronchial responsiveness to acetylcholine after long-term treatment with (Muranaka M et al), 350

Granulocyte response to isoproterenol during in vitro influenza virus incubation, cortisol protection of (Busse WW et al), 178
to phosphodiesterase inhibitor RO 20-1724 in asthma (Busse WW, Anderson CL), 70

H

Haemolytic anaemia, idiopathic warm autoimmune, human leucocyte antigens A, B, C, and DRW in, 22 (Abst.)
Hay fever, ragweed, immunotherapy with short ragweed fraction A:D-glutamic acid:D-lysine polymer in (Butterfield JH et al), 272
Headache, cluster, mast cells in, 26 (Abst.)
Heat urticaria/angioedema, local; evidence for histamine release without complement activation (Grant JA et al), 75
Hemodialysis-associated asthma in renal failure, 16 (Abst.)
Histamine and allergen-induced skin tests, correlation of serum theophylline levels with inhibition of, 26 (Abst.)
basophil and mast cell, released by agent that blocks cyclooxygenase and lipoxygenase metabolism of arachidonic acid; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444
^{14}C, given intrabronchially to asthmatic patients, metabolism of, 16 (Abst.)
and corticosteroids, inhibitory effects of, on human lymphocytes (Wang SR, Zweiman B), 39
-induced bronchoconstriction and cutaneous wheal response in asthmatic patients, comparison of actions of H_1 and H_2 antihistamines on (Nathan RA et al), 171
infused, effects on asthmatic and normal subjects; skin test responses compared (Summers R et al), 456
inhalation tests repeated in asthmatic patients (Ruffin RE et al), 285
inhaled, airway response in asymptomatic long-term marijuana smokers (Hernandez MJ et al), 153
and prostaglandin-$F_{2\alpha}$ responsiveness in dog, effect on beta adrenergic blockade on (Snapper JR et al), 199
release without complement activation, evidence for; local heat urticaria/angioedema (Grant JA et al), 75
from human lung and leukocytes in vitro, inhibition and stimulation with oxatomide, 25 (Abst.)
IgE-mediated, analysis of triggering events in mast cells for (Ishizaka T), 90
urinary, measurement of; development of methodology and normal values (Myers G et al), 305
Hopkin's syndrome, poliomyelitis-like illness associated with acute bronchial asthma, immunological abnormalities in, 7 (Abst.)
Hornet venom, biochemical and immunologic properties compared (Mueller U et al), 290
Human(s), genetics of total IgE levels in, report on National Institute of Allergy and Infectious Diseases–sponsored workshop (Meyers DA and Marsh DG), 167 (Committee report)
IgE and IgG antibody responses to minor ragweed allergen Ra3; correlation with skin tests and with other allergens (Platts-Mills TAE et al), 129
leucocyte antigens A, B, C, and DRW in idiopathic warm autoimmune haemolytic anaemia, 22 (Abst.)
lung and leukocytes in vitro, histamine release from, inhibition and stimulation with oxatomide, 25 (Abst.)
Humoral and cellular immune functions, effects of increasing weekly doses of ascorbate on, in normal volunteers, 2 (Abst.)
Hydrocortisone, intravenous injection in a non-atopic, non-aspirin sensitive asthmatic, severe bronchial reaction and cardiopulmonary arrest following, 12 (Abst.)
myopathy, acute, 25 (Abst.)
Hydroxizine and chlorpheniramine, relative efficacy of; pharmacologic prophylaxis of allergic rhinitis (Wong L et al), 223
Hymenoptera allergic emergency, factitious; report of new variant of Munchausen's syndrome (Hendrix S et al), 8
antigens, whole body, as compared with venom, skin-test reactivity of human volunteers to, multicenter study on (Schwartz HJ et al), 81 (Committee report)
venom immunotherapy, dose dependence of (Golden DBK et al), 370
prolonged maintenance interval in (Golden DBK et al), 482
Hyperpnea and cold air in asthma, effects of cromolyn sodium on airway response to, 27 (Abst.)
Hyperreactivity, airways, and bronchial mucosal permeability (Hogg JC), 421 (Postgraduate course presentation)
bronchial, to methacholine in farmers' lung disease (Freedman PM, Ault B), 59
Hyporesponsiveness, adrenergic, in allergic rhinitis and asthma; autoantibodies to beta 2-adrenergic receptors as possible cause, 9 (Abst.)
Hypersensitivity, bee sting, immunotherapy in, 19 (Abst.)
delayed, in diagnosis of dermatomycoses, simplified in vitro assay of (Hunjan BS et al), 485
effect of cimetidine on, 31 (Abst.)
immediate, in exercise-induced asthma, evaluation of role played by mediators of, 21 (Abst.)
to inhaled flour allergens; cereals compared, 27 (Abst.)
reactions, cyclic AMP in, 20 (Abst.)
Hyposensitization treatment, allergic, onset of polyarteritis nodosa during, 15 (Abst.)

I

Immune competence, loss with age due to auto-anti-idiotypic antibody regulation, 30 (Abst.)
functions, cellular and humoral, effects of increasing weekly doses of ascorbate on, in normal volunteers, 2 (Abst.)
responses, humoral and cell-mediated, to fractions of birch pollen extract, 18 (Abst.)
Immunity, cell-mediated, and in vitro effect of thymic humoral factor on blood lymphocytes of children with atopic dermatitis, 3 (Abst.)
in male infertility, 17 (Abst.)
to soluble and particulate antigens, 29 (Abst.)
Immunogenetics of atopic diseases (Marsh DG and Meyers DA), 247; Reply (Blumenthal MN et al), 248 (Correspondence)
Immunoglobulin A in celiac disease, variable levels of, 11 (Abst.)
circadian rhythm, nasal secretory; single-dose suppression test, 13 (Abst.)
D concentrations, serum, in normal infants, children, and adults, and in patients with elevated IgE, 10 (Abst.)
E antibody(ies), California house dust, in sera of allergic Nigerian patients, 18 (Abst.)
ragweed-specific, in patients undergoing immunotherapy, comparison of radioallergosorbent test and solid-phase radioimmunoassay (Zeiss CR et al), 105
in workers sensitive to toluene diisocyanate, antigens that detect, 24 (Abst.)
complement, and IgG4 antibodies in diagnosis of atopic diseases, 5 (Abst.)
elevated, serum IgD concentrations in normal infants, children, and adults, and in patients with, 10 (Abst.)
and IgG antibody responses, human, to minor ragweed allergen Ra3; correlation with skin tests and with other allergens (Platts-Mills TAE et al), 129
levels, total, in humans, genetics of; report on National Institute of Allergy and Infectious Diseases–sponsored workshop (Meyers DA and Marsh DG), 167 (Committee report)
-mediated, antigen-induced monkey asthma and skin reactions, inhibition of by 5,8,11,14-eicosatetraynoic acid (Patterson R and Harris KE), 146

Immunoglobulin E-mediated—Cont'd
asthma in rhesus monkeys, inhibition by agent that releases basophil and mast cell histamine but blocks cyclo-oxygenase and lipoxygenase metabolism of arachidonic acid (Patterson R et al), 444
histamine release, analysis of triggering events in mast cells for (Ishizaka T), 90
serum, elevated, in bronchial carcinoma (Hällgren R et al), 398
levels in twins, 8 (Abst.)
specific, microtiter solid-phase radioimmunoassay for (Reid MJ et al), 263
G, antigen-specific, in human serum, quantitation of; comparison of radioimmunoprecipitation and solid-phase radioimmunoassay techniques for measurement of IgG specific for complex allergen mixture (yellow jacket venom) (Hamilton RG, Adkinson NF Jr), 14
and IgE antibody responses, human, to minor ragweed allergen Ra3; correlation with skin tests and with other allergens (Platts-Mills TAE et al), 129
G4 and IgE antibodies and complement in diagnosis of atopic diseases, 5 (Abst.)
receptors, surface, of human lymphocytes in pollinosis, 2 (Abst.)
Immunologic adjuvant, lithium as, 22 (Abst.)
Immunology, 1, 5, 10, 17, 22, 28 (Absts.)
Immunotherapy in bee sting hypersensitivity, 19 (Abst.)
Hymenoptera venom, dose dependence of (Golden DBK et al), 370
prolonged maintenance interval in (Golden DBK et al), 482
nasal, with modified allergen, inhibition of murine reaginic antibody responses by, 30 (Abst.)
patients undergoing; comparison of radioallergosorbent test and solid-phase radioimmunoassay in (Zeiss CR et al), 105
polymerized antigens for, further studies on safety of (Hendrix SG et al), 124
preseasonal intranasal, with nebulized short ragweed extract (Welsh PW et al), 237
with short ragweed fraction A:D-glutamic acid:D-lysine polymer in ragweed hay fever (Butterfield JH et al), 272
Indomethacin and ascorbic acid, effects on airways of healthy male subjects with and without induced bronchoconstriction (Ogilvy CS et al), 363
Infantile bronchial asthma (Tabachnik E and Levison H), 339 (Postgraduate course presentation)
Infection, streptococcal, acute urticaria associated with, 2 (Abst.)
Influenza virus incubation, in vitro, cortisol protection of granulocyte response to isoproterenol (Busse WW et al), 178
Inhalation test(s), histamine, repeated in asthmatic patients (Ruffin RE et al), 285
provocation, standardization of; influence of nebulizer output, particle size, and method of inhalation (Ryan G et al), 156
Inhibitors, cyclo-oxygenase and lipoxygenase; effect on release of slow-reacting substance of anaphylaxis from dispersed pig lung cells (Paterson NAM et al), 426
Insulin allergy, chronic urticaria secondary to, 6 (Abst.)
porcine and bovine monocomponent, generalised allergy to, 5 (Abst.)
Iodides in bronchial asthma (Tuft L), 497 (Correspondence)
20-Isopropylidene PGE_2 as a new aerosol bronchodilator, 14 (Abst.)
Isoproterenol, granulocyte response during in vitro influenza virus incubation, cortisol protection of (Busse WW et al), 178

K

Kinetics of release of known allergens in relation to biologic activity (Marsh DG et al), 206

L

Leukocyte(s) antigens A, B, C, and DRW, human, in idiopathic warm autoimmune haemolytic anaemia, 22 (Abst.)
and human lung in vitro, histamine release from, inhibition and stimulation with oxatomide, 25 (Abst.)
Lipoxygenase and cyclo-oxygenase inhibitors; effect on release of slow-reacting substance of anaphylaxis from dispersed pig lung cells (Paterson NAM et al), 426
metabolism of arachidonic acid blocked by agent that releases basophil and mast cell histamine; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444
Lithium as immunologic adjuvant, 22 (Abst.)
Lung cancer and brown lung in textile workers; exposure to cotton dust and respiratory disease, 23 (Abst.)
disease, farmers', bronchial hyperreactivity to methacholine in (Freedman PM, Ault B), 59
skin testing in (Freedman PM et al), 51
human, and leukocytes in vitro, histamine release from, inhibition and stimulation with oxatomide, 25 (Abst.)
Lymphocyte(s), blood, of children with atopic dermatitis, cell-mediated immunity and in vitro effect of thymic humoral factor on, 3 (Abst.)
human, inhibitory effects of corticosteroids and histamine on (Wang SR, Zweiman B), 39
surface Ig receptors of, in pollinosis, 2 (Abst.)
stimulation and monocyte chemotaxis in vitro; tetanus toxoid skin test in children, 28 (Abst.)
T, functions of, and 1-chloro-2, 4-dinitrobenzene contact sensitivity in myasthenia gravis, effects of adult thymectomy on development of, 23 (Abst.)

M

Macrophages, alveolar, of slow-reacting substance of anaphylaxis released from pig lung cells, inactivation by (Paterson NAM and Craig ID), 435
Male infertility, cell-mediated immunity in, 17 (Abst.)
subjects, healthy, with and without induced bronchoconstriction, effects of ascorbic acid and indomethacin on airways of (Ogilvy CS et al), 363
Marijuana smokers, long-term, asymptomatic, airway response to inhaled histamine in (Hernandez MJ et al), 153
Mast cell(s), analysis of triggering events for IgE-mediated histamine release (Ishizaka T), 90 (The Robert A. Cooke Memorial Lecture)
and basophil histamine release by agent that blocks cyclo-oxygenase and lipoxygenase metabolism of arachidonic acid; inhibition of IgE-mediated asthma in rhesus monkeys (Patterson R et al), 444
in cluster headache, 26 (Abst.)
Mediators of immediate hypersensitivity in exercise-induced asthma, evaluation of role played by, 21 (Abst.)
Metabolism of ^{14}C-histamine given intrabronchially to asthmatic patients, 16 (Abst.)
Metal allergy and the surgical patient, 6 (Abst.)
Methacholine airway reactivity, effect of inhaled corticosteroid on (Easton JG), 388
and antigen challenge, differential effects on gas exchange in allergic subjects (Oligiati et al), 325
bronchial hyperreactivity to, in farmers' lung disease (Freedman PM, Ault B), 59
Micropolyspora faeni and *Thermoactinomyces candidus*, characterization of synthetic medium antigens of (Treuhaft MW et al), 375
Migraineurs and normals, C-1 inhibitor levels in, 32 (Abst.)
Millet seeds, anaphylaxis after ingestion of (Parker JL et al), 78 (Brief communication)
Miscellaneous allergies, 2, 5, 12, 18, 23, 30 (Absts.)

Monkey(s) asthma and skin reactions, IgE-mediated and antigen-induced, inhibition by 5,8,11,14-eicosatetraynoic acid (Patterson R and Harris KE), 146
rhesus and cynomolgus, respiratory reponses to *Ascaris* antigen in (O'Neil RM and Goodman FR), 229
rhesus, inhibition of IgE-mediated asthma in by an agent that releases basophil and mast cell histamine but blocks cyclo-oxygenase and lipoxygenase metabolism of arachidonic acid (Patterson R et al), 444
Monoclonal antibodies, enumeration of T-cell subsets in atopic dermatitis using (Leung DYM et al), 450
Monocyte chemotaxis under agarose; defects in atopic disease, aspirin therapy, and mucocutaneous candidiasis, 29 (Abst.)
and lymphocyte stimulation in vitro; tetanus toxoid skin test in children, 28 (Abst.)
Mucocutaneous candidiasis, aspirin therapy, and atopic disease, defects in; monocyte chemotaxis under agarose, 29 (Abst.)
Mucosa, nasal, priming by ragweed extract or by irritant (ammonia) (Bacon JR et al), 111
Mucosal permeability, bronchial, and airways hyperreactivity (Hogg JC), 421 (Postgraduate course presentation)
Mucous and fluid secretions in airways, regulation of (Nadel JA), 417 (Postgraduate course presentation)
Mucus transport, tracheal, impaired, in allergic bronchoconstriction; effect of terbutaline pretreatment (Weissberger et al), 357
Multicenter study on skin-test reactivity of human volunteers to venom as compared with whole body Hymenoptera antigens (Schwartz HJ et al), 81 (Committee report)
Munchausen's syndrome, report of new variant of; factitious Hymenoptera allergic emergency (Hendrix S et al), 8
Murine model; transfer factor, 28 (Abst.)
reaginic antibody responses, inhibition by nasal immunotherapy with modified allergen, 30 (Abst.)
Myasthenia gravis, effects of adult thymectomy on development of 1-chloro-2, 4-dinitrobenzene contact sensitivity and other T lymphocyte functions in, 23 (Abst.)
Mycobacterium tuberculosis, persistently negative tuberculin reaction among children with culture positive for (tuberculin negative tuberculosis), 7 (Abst.)
Myofascial pain-dysfunction syndrome, relationship between allergy and bruxism in patients with, 3 (Abst.)
Myopathy, acute hydrocortisone, 25 (Abst.)

N

NARES syndrome, nonallergic rhinitis with eosinophilia; clinical and immunologic presentation (Jacobs et al), 253
Nasal disease, classification of; an opinion (Mullarkey MF), 251 (Editorial)
immunotherapy with modified allergen, inhibition of murine reaginic antibody responses by, 30 (Abst.)
mucosa, priming by ragweed extract or by irritant (ammonia) (Bacon JR et al), 111
smears in allergic rhinitis, problems in examination of, 25 (Abst.)
spray, flunisolide, short-term efficacy trial and 24-month follow-up of, in treatment of perennial rhinitis (Clayton DE et al), 2
National Institute of Allergy and Infectious Diseases, report on workshop on genetics of total IgE levels in humans (Meyers DA and Marsh DG), 167 (Committee report)
Nonallergic rhinitis with eosinophilia (NARES syndrome); clinical and immunologic presentation (Jacobs et al), 253
Nonsteroidal anti-inflammatory–analgesic drugs and cutaneous tests for immediate hypersensitivity (Simon RA et al), 247 (Correspondence)

O

Oxatomide; inhibition and stimulation of histamine release from human lung and leukocytes in vitro, 25 (Abst.)

P

Parental overprotection and asthma, 4 (Abst.)
Patch test materials, standard, reactions to, 23 (Abst.)
Pathology, pharmacology, and physiology, 4, 8, 13, 20, 24, 31 (Absts.)
Peak expiratory flow rate; use in ongoing asthma treatment, 24 (Abst.)
Peanut allergen, major, isolation and partial characterization of (Sachs MI et al), 27
Pediatrics, 4, 7, 12, 19 (Absts.)
Permeability, bronchial mucosal, and airways hyperreactivity (Hogg JC), 421 (Postgraduate course presentation)
PGE_2; *see* Prostaglandin E_2
Pharmacology, physiology, and pathology, 4, 8, 13, 20, 24, 31 (Absts.)
Phosphodiesterase inhibitor RO 20-1724, granulocyte response to, in asthma (Busse WW, Anderson CL), 70
Physiology, pathology, and pharmacology, 4, 8, 13, 20, 24, 31 (Absts.)
Pig lung cells, dispersed, release of slow-reacting substance of anaphylaxis from; effect of cyclo-oxygenase and lipoxygenase inhibitors (Paterson NAM et al), 426
inactivation of alveolar macrophages of slow-reacting substance of anaphylaxis released from (Paterson NAM and Craig ID), 435
Plant cloning experiments, allergic reactions to enzymes used in (Ransom JH and Schuster M), 412 (Brief communication)
Poison ivy and related species, black spot test for, 31 (Abst.)
Poliomyelitis-like illness associated with acute bronchial asthma (Hopkin's syndrome), immunological abnormalities in, 7 (Abst.)
Pollen allergens, Russian thistle *(Salsola pestifer)*, isolation and characterization of (Shafiee A et al), 472
antigens, tree, polymerized (Patterson R et al), 162 (Brief communication)
extract, birch, humoral and cell-mediated immune responses to fractions of, 18 (Abst.)
short ragweed, rapidly released allergens from. I. Kinetics of release of known allergens in relation to biologic activity (Marsh DG et al), 206; II. Identification and partial purification (Hussain R et al), 217
Pollinosis, surface Ig receptors of human lymphocytes in, 2 (Abst.)
Polyarteritis nodosa, onset during allergic hyposensitization treatment, 15 (Abst.)
Polymerized antigens for immunotherapy, further studies on safety of (Hendrix SG et al), 124
tree pollen antigens (Patterson R et al), 162 (Brief communication)
Porcine and bovine monocomponent insulins, generalised allergy to, 5 (Abst.)
Prednisolone disposition in steroid-depenuent asthmatic children (Rose JQ et al), 188
Pregnancy, asthma in, 9 (Abst.)
Preservatives and conditions of storage, effect of, on potency of allergy extracts (Nelson HS), 64
Prophylaxis, pharmacologic, of allergic rhinitis; relative efficacy of hydroxyzine and chlorpheniramine (Wong L et al), 223
Prostaglandin E_2, 20-isopropylidene, as a new aerosol bronchodilator, 14 (Abst.)
$F_{2\alpha}$ and histamine responsiveness in dog, effect of beta adrenergic blockade on (Snapper JR et al), 199
-like substances in urine of asthmatic patients, 8 (Abst.)
Protection, parental, and asthma, 4 (Abst.)
Protein, soluble, from tracheal smooth muscle, effect of theophylline on binding of cAMP to, 20 (Abst.)

R

Radioallergosorbent test, conventional, comparison with modified radioallergosorbent test, diagnostic and therapeutic applications of (Santrach PJ et al), 97

Radioallergosorbent test—Cont'd
inhibition, approach to fungal antigen relationships by (Karr RM et al), 194
in 1981; limitations and refinements (Adkinson NF Jr), 87 (Editorial)
modified, diagnostic and therapeutic applications of, comparison with conventional radioallergosorbent test (Santrach PJ et al), 97
and quantitative solid-phase radioimmunoassay, compared; detection of ragweed-specific IgE antibody in patients undergoing immunotherapy (Zeiss CR et al), 105
Radiographic contrast media studies, pretreatment of high-risk patients requiring (Greenberger PA et al), 185
Radioimmunoassay, microtiter solid-phase, for specific IgE (Reid MJ et al), 263
solid-phase, and radioallergosorbent test, compared; detection of ragweed-specific IgE antibody in patients undergoing immunotherapy (Zeiss CR et al), 105
and radioprecipitation techniques, comparison of, for measurement of IgG specific for complex allergen mixture (yellow jacket venom); quantitation of antigen-specific IgG in human serum (Hamilton RG, Adkinson NF Jr), 14
Radioimmunoprecipitation and solid-phase radioimmunoassay techniques, comparison of, for measurement of IgG specific for complex allergen mixture (yellow jacket venom); quantitation of antigen-specific IgG in human serum (Hamilton RG, Adkinson NF Jr), 14
Ragweed allergen Ra3, minor, human IgE and IgG antibody responses to; correlation with skin tests and with other allergens (Platts-Mills TAE et al), 129
two variants of (Goodfriend L et al), 299
extract, priming of nasal mucosa by, or by irritant (ammonia) (Bacon JR et al), 111
short, nebulized, preseasonal intransaal immunotherapy with (Welsh PW et al), 237
hay fever, immunotherapy with short ragweed fraction A:D-glutamic acid:D-lysine polymer in (Butterfield JH et al), 272
pollen, short, rapidly released allergens from. I. Kinetics of release of known allergens in relation to biologic activity (Marsh DG et al), 206; II. Identification and partial purification (Hussain R et al), 217
short, fraction A:D-glutamic acid:D-lysine polymer in ragweed hay fever, immunotherapy with (Butterfield JH et al), 272
-specific IgE antibody in patients undergoing immunotherapy; comparison of radioallergosorbent test and solid-phase radioimmunoassay for (Zeiss CR et al), 105
RAST; *see* Radioallergosorbent test
Renal failure, hemodialysis-associated asthma in, 16 (Abst.)
Report on National Institute of Allergy and Infectious Diseases–sponsored workshop on genetics of total IgE levels in humans (Meyers DA and Marsh DG), 167 (Committee report)
Respiratory disease and exposure to cotton dust; textile workers, brown lung, and lung cancer, 23 (Abst.)
Resuscitative equipment, statement on, by American Academy of Allergy, 1
Rhesus monkey; *see* Monkey, rhesus
Rheumatoid nuclear antigen, antibody to; relationship to in vivo Epstein-Barr virus infection, 11 (Abst.)
Rhinitis, allergic, and allergic asthma, airway responses to antigen challenge in (Ahmed T et al), 135
and asthma, adrenergic hyporesponsiveness in; autoantibodies to beta 2-adrenergic receptors as possible cause, 9 (Abst.)
pharmacologic prophylaxis of; relative efficacy of hydroxyzine and chlorpheniramine (Wong L et al), 223
problems in examination of nasal smears in, 25 (Abst.)
nonallergic, with eosinophilia (NARES syndrome); clinical and immunologic presentation (Jacobs et al), 253
Rhinitis—Cont'd
perennial, short-term efficacy trial and 24-month follow-up of flunisolide nasal spray in treatment of (Clayton DE et al), 2
RO 20-1724 (phosphodiesterase inhibitor), granulocyte response to, in asthma (Busse WW, Anderson CL), 70
Roentgenogram and transillumination, comparison of, in diagnosing paranasal sinus disease (Spector SL et al), 22
Russian thistle *(Salsola pestifer)* pollen allergens, isolation and characterization of (Shafiee A et al), 472

S

Salsola pestifer; see Russian thistle
Seasonal allergy, performance in students with, 21 (Abst.)
Serum, human, quantitation of antigen-specific IgG in; comparison of radioimmunoprecipitation and solid-phase radioimmunoassay techniques for measurement of IgG specific for complex allergen mixture (yellow jacket venom) (Hamilton RG, Adkinson NF Jr), 14
IgD concentrations in normal infants, children, and adults, and in patients with elevated IgE, 10 (Abst.)
IgE levels in twins, 8 (Abst.)
Sesame seed ingestion, anaphylaxis after (Malish D et al), 35
Sex differences in the prevalence of asthma, genetic basis of, 5 (Abst.)
Sinus disease, paranasal, comparison of transillumination and roentgenogram in diagnosing (Spector SL et al), 22
Skin-blister fluid, from allergen-tested and normal skin, induction of late cutaneous reactions by (Dorsch W and Ring J), 117
normal and allergen-tested, skin-blister fluid from, induction of late cutaneous reactions by (Dorsch W and Ring J), 117
reactions and asthma, monkey, IgE-mediated, antigen-induced, inhibition by 5,8,11,14-eicosatetraynoic acid (Patterson R and Harris KE), 146
test(s), allergen and histamine-induced, correlation of serum theophylline levels with inhibition of, 26 (Abst.)
in farmers' lung disease (Freedman PM et al), 51
reactivity of human volunteers to venom as compared with whole body Hymenoptera antigens, multicenter study on (Schwartz HJ et al), 81 (Committee report)
responses compared; effects of infused histamine on asthmatic and normal subjects (Summers R et al), 456
tetanus toxoid, in children; correlation with in vitro lymphocyte stimulation and monocyte chemotaxis, 28 (Abst.)
Slow-reacting substance of anaphylaxis released from pig lung cells, inactivation by alveolar macrophages of (Paterson NAM and Craig ID), 435
dispersed pig lung cells; effect of cyclo-oxygenase and lipoxygenase inhibitors (Paterson NAM et al), 426
Sodium, cromolyn, effects on airway response to hyperpnea and cold air in asthma, 27 (Abst.)
Steroid-dependent asthmatic children, prednisolone disposition in (Rose JQ et al), 188
Storage, conditions of, and preservatives, effect of, on potency of allergy extracts (Nelson HS), 64
Streptococcal infection, acute urticaria associated with, 2 (Abst.)

T

T cell(s), effect of thymosin therapy on, in DiGeorge syndrome, 1 (Abst.)
subsets in atopic dermatitis, enumeration using monoclonal antibodies (Leung DYM et al), 450
T lymphocyte functions and 1-chloro-2, 4-dinitrobenzene contact sensitivity in myasthenia gravis, effects of adult thymectomy on development of, 23 (Abst.)
Terbutaline pretreatment; effect on impaired tracheal mucus transport in allergic bronchoconstriction (Weissberger et al), 357

Tetanus toxoid skin test in children; correlation with in vitro lymphocyte stimulation and monocyte chemotaxis, 28 (Abst.)
Theophylline and depression, 32 (Abst.)
effect on binding of cAMP to soluble protein from tracheal smooth muscle, 20 (Abst.)
cortisol secretion (Tulin-Silver J et al), 45
gastroesophageal reflux in normal adults (Berquist WE et al), 407 (Brief communication)
levels, serum, correlation with inhibition of allergen and histamine-induced skin tests, 26 (Abst.)
sustained-release, intrasubject variation in absorption of (Dederich RA et al), 465
Thermoactinomyces candidus and *Micropolyspora faeni*, characterization of synthetic medium antigens of (Treuhaft MW et al), 370
Thymectomy, adult, effects on development of 1-chloro-2, 4-dinitrobenzene contact sensitivity and other T lymphocyte functions in myasthenia gravis, 23 (Abst.)
Thymic humoral factor, in vitro effect of, and cell-mediated immunity, on blood lymphocytes of children with atopic dermatitis, 3 (Abst.)
Thymosin therapy in DiGeorge syndrome, 1 (Abst.)
Toluene diisocyanate, antigens that detect IgE antibodies in workers sensitive to, 24 (Abst.)
Tracheal mucus transport, impaired, in allergic bronchoconstriction; effect of terbutaline pretreatment (Weissberger et al), 357
Transfer factor; a murine model, 28 (Abst.)
Transillumination and roentgenogram, comparison of, in diagnosing paranasal sinus disease (Spector SL et al), 22
Tree pollen antigens, polymerized (Patterson R et al), 162 (Brief communication)
Tuberculin reaction, persistently negative, presence among children with culture positive for *Mycobacterium tuberculosis* (tuberculin negative tuberculosis), 7 (Abst.)

U

Urine of asthmatic patients, prostaglandin-like substances in, 8 (Abst.)
Urticaria, acute, associated with streptococcal infection, 2 (Abst.)
chronic, secondary to insulin allergy, 6 (Abst.)
cold, gastric acid secretion in, 30 (Abst.)
heat, and angioedema, local; evidence for histamine release without complement activation (Grant JA et al), 75

V

Venom(s), compared with whole body Hymenoptera antigens, skin-test reactivity of human volunteers to, multicenter study on (Schwartz HJ et al), 81 (Committee report)
hornet, four species, biochemical and immunologic properties compared (Mueller U et al), 290
immunotherapy, Hymenoptera, dose dependence of (Golden DBK et al), 370
prolonged maintenance interval in (Golden DBK et al), 482
yellow jacket, comparison of radioimmunoprecipitation and solid-phase radioimmunoassay techniques for measurement of IgG specific for; quantitation of antigen-specific IgG in human serum (Hamilton RG, Adkinson NF Jr), 14
Virus infection, Epstein-Barr, in vivo; relationship of antibody to rheumatoid nuclear antigen to, 11 (Abst.)

W

Wheal response, cutaneous, and histamine-induced bronchoconstriction, comparison of actions of H_1 and H_2 antihistamines on (Nathan RA et al), 171
Women, infertile, local production of anti-sperm antibodies in, 10 (Abst.)
Workshop on genetics of total IgE levels in humans, National Institute of Allergy and Infectious Diseases report (Meyers DA and Marsh DG), 167 (Committee report)

Subject index

A

Acknowledgment of reviewers, 485
Additives and food, in vitro stimulation of lymphocytes in chronic urticaria induced by, 18 (Abst.)
Adrenocorticosteroids, effect on late-phase inflammatory responses induced by mast cell granules; biologic activity of mast cell granules in rat skin (Oertel H, Kaliner M), 238
Age-related impairment of in vitro antibody response in humans, 6 (Abst.)
Aging and serum IgE levels, immediate skin tests, and RAST (Stoy PJ et al), 421
Agonist(s), alpha- and beta-adrenergic, and histamine interrelated in canine airways (Leff AR, Munoz NM), 300
  beta-adrenoreceptor, in human bronchial smooth muscle, tachyphylaxis to, 9 (Abst.)
  beta-receptor, desensitization of isolated human bronchial smooth muscle to (Avner BP, Jenne JW), 51
Airway(s), canine, interrelationship between alpha- and beta-adrenergic agonists and histamine in (Leff AR, Munoz NM), 300
  hyperreactivity, manifestation of; chronic cough in children, 2 (Abst.)
  obstruction in bronchial asthma, effects of vagolytic drugs on, 19 (Abst.)
  reactivity in cotton bract–induced bronchospasm, 29 (Abst.)
  response to sublingual nitroglycerin in acute asthma, 20 (Abst.)
  responsiveness to histamine as a test for overall severity of asthma in children (Murray AB et al), 119
  smooth muscle, isolated, guinea pig, parainfluenza 3 infection blocks the ability of a beta adrenergic receptor agonist to inhibit antigen-induced contraction of, 28 (Abst.)
  syndromes, trimellitic anhydride, clinical and immunologic correlations in (Sale SR et al), 188
Alcohol in anti-asthma elixirs (Barna P), 161 (Correspondence)
Aldehyde modification in two steps, preparation of ragweed pollen allergoids by (Marsh DG et al), 449
Alkalosis, metabolic, and Neo-Mull-Soy; a model of Bartter's syndrome, 9 (Abst.)
Allergen(s), atmospheric, immunochemical method to measure (Agarwal MK et al), 194
  house dust, mite feces are major source of, 29 (Abst.)
  immunotherapy with modified allergens (Patterson R), 85 (Robert A. Cooke Memorial Lecture)
  modified, allergen immunotherapy with (Patterson R), 85 (Robert A. Cooke Memorial Lecture)
  naturally occurring, allergoids from. III. Preparation of ragweed pollen allergoids by aldehyde modification in two steps (Marsh DG et al), 449; IV. Efficacy and safety of long-term allergoid treatment of ragweed hay fever (Norman PS et al), 460
  skin-test reactivity, age, and sex, correlations with distribution of IgE in a community population sample (Barbee RA et al), 106
    in a community population sample; correlation with age, histamine skin reactions, and total serum IgE (Barbee RA et al), 15
Allergic asthma and *Ascaris lumbricoides*, 6 (Abst.)
  bronchopulmonary aspergillosis in corticosteroid-dependent asthmatics (Basich JE et al), 98
    with low serum IgE (Schwartz RH, Hollick GE), 290
  and intrinsic asthma, HLA-A, B, C, and D antigens in, 11 (Abst.)
  reactions, human, histamine suppression of in vivo eosinophil accumulation and histamine release in (Ting S et al), 65
  rhinitis, ragweed, local intranasal immunotherapy for (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
Allergoid(s) from naturally occurring allergens. III. Preparation of ragweed pollen allergoids by aldehyde modification in two steps (Marsh DG et al), 449; IV. Efficacy and safety of long-term allergoid treatment of ragweed hay fever (Norman PS et al), 460
  treatment of ragweed hay fever, long-term, efficacy and safety of (Norman PS et al), 460
Allergy, atopic, serum IgE, and RAST specific antibodies in cystic fibrosis, 19 (Abst.)
  food, in fully breast-fed infants, 3 (Abst.)
  Hymenoptera, role of cell-mediated immunity in (Case RL et al), 399
  insect venom, a prospective case study showing lack of correlation between immunologic reactivity and clinical sensitivity (Reisman RE et al), 406
  miscellaneous, 3, 8, 12, 18, 22, 27 (Absts.)
  to murine antigens (Schumacher MJ et al), 310
  penicillin, skin testing for (Van Dellen), 169 (Editorial)
    to detect (Sullivan TJ et al), 171
  societies, state, regional, and local, listing of presidents of, as of January 1981, 163
Alpha$_1$-adrenoreceptor antagonist (prazosin) partially inhibiting exercise-induced asthma (Barnes PJ et al), 411
  antitrypsin levels, serum, in individuals with deficiency of this antiprotease, danazol-induced augmentation of, 13 (Abst.)
Alpha- and beta-adrenergic agonists and histamine interrelated in canine airways (Leff AR, Munoz NM), 300
Aminophylline improves diaphragmatic contractility, 28 (Abst.)
  salbutamol, and combined intravenous infusions in acute severe asthma, 25 (Abst.)
Anaphylactic hypersensitivity specific for penicilloate minor determinant to penicillin and carbenicillin, desensitization of (Gorevic PD, Levine BB), 267
Anaphylactoid episodes, urticaria, and angioedema, exercise-induced (Lewis J et al), 432
Anaphylaxis, exercise-induced, and cholinergic urticaria (Kaplan AP et al), 319
  IgE-mediated, with inhaled cromolyn sodium (Brown LA et al), 416
  potentiated, in patients with drug-induced beta-adrenergic blockade (Jacobs RL et al), 125
Angioedema, hereditary, clinical and biochemical effects of stanozolol therapy for (Sheffer AL et al), 181
  and urticaria, and anaphylactoid epidoses, exercise-induced (Lewis J et al), 432
    severe attacks caused by aromatic plants, 8 (Abst.)
Antagonists, calcium, in exercise-induced asthma, 17 (Abst.)
Anti-asthma elixirs, alcohol in (Barna P), 161 (Correspondence)
Antibody(ies) to *Aspergillus fumigatus* in farmer's lung patients measured by enzyme-linked immunosorbent assay, 10 (Abst.)

July, pp. 1-84; August, pp. 85-168; September, pp. 169-246; October, pp. 247-326; November, pp. 327-410; December, pp. 411-502.

Abstracts: July, pp. 1-4; August, pp. 5-10; September, pp. 11-16; October, pp. 17-20; November, pp. 21-24; December, pp. 25-30.

Antibody(ies)—Cont'd
blocking, to pollen antigens, measurement by radiolabelled protein A from *Staphylococcus aureus*, 18 (Abst.)
deficiency, screening for by Schick test, 27 (Abst.)
IgE and cellular proliferative response, effect of immunotherapy on; lymphocyte responsiveness to *Dermatophagoides farinae* extract in mite-sensitive patients (Hiratani M et al), 205
that crossreact with vegetable foods, pollen, and Hymenoptera venom (Aalberse RC et al), 356
RAST specific, atopic allergy, and serum IgE in cystic fibrosis, 19 (Abst.)
and immunoglobulins, secretory, calculation of (Mathews KP), 46
response in humans, in vitro, age-related impairment of, 6 (Abst.)
Antigen(s), HLA-A, B, C, and D, in intrinsic and allergic asthma, 11 (Abst.)
-induced bronchoconstriction, inhibition with reproterol, a new beta agonist–xanthine derivative, 15 (Abst.)
bronchospasm, effect of inhaled lodoxamide tromethamine in prevention of (Ungerer RG et al), 471
contraction of guinea pig isolated airway smooth muscle, parainfluenza 3 infection blocks the ability of a beta adrenergic receptor agonist to inhibit, 28 (Abst.)
inhaled, inhibition of specific IgE responses in mice by preexposure to, 26 (Abst.)
murine, allergy to (Schumacher MJ et al), 310
pollen, blocking antibodies to, measurement by radiolabelled protein A from *Staphylococcus aureus*, 18 (Abst.)
-presenting cells, capacity of B cells to serve as, 17 (Abst.)
-specific desensitization in a rabbit model of acute hypersensitivity pneumonitis (Richerson HB et al), 226
Anti-IgE and anti-IgG in basophils from patients with bronchial asthma, differences in response to, 25 (Abst.)
Antitoxin, botulinal, hypersensitivity reactions with, 12 (Abst.)
Aquagenic and cholinergic urticaria, evaluation of a patient with (Davis RS et al), 479
Aromatic plants; a cause of severe attacks of angioedema and urticaria, 8 (Abst.)
Arterial pressure, normal, of carbon dioxide in hypoxia, chronic stable asthma and, 2 (Abst.)
Ascaris lumbricoides and allergic asthma, 6 (Abst.)
Ascorbic acid, high dose, in Nigerian asthmatics, 5 (Abst.)
Aspergillosis, allergic bronchopulmonary, in corticosteroid-dependent asthmatics (Basich JE et al), 98
with low serum IgE (Schwartz RH, Hollick GE), 290
Aspergillus fumigatus in farmer's lung patients, antibodies to, measured by enzyme-linked immunosorbent assay, 10 (Abst.)
Aspirin-sensitive asthma (Basomba A et al), 484; Reply (Stevenson DD), 484 (Correspondence)
asthmatics, bronchospasm caused by intravenous hydrocortisone sodium succinate (Solu-Cortef) in (Dajani BM et al), 201
Asthma, acute, airway response to sublingual nitroglycerin in, 20 (Abst.)
severe, aminophylline, salbutamol, and combined intravenous infusions in, 25 (Abst.)
allergic, and *Ascaris lumbricoides*, 6 (Abst.)
aspirin-sensitive (Basomba A et al), 484; Reply (Stevenson DD), 484 (Correspondence)
atopic, corticosteroid-sensitive lymphocytes are normal in (Schuyler MR et al), 72
baker's, 1 (Abst.)
basophil "releasability" in, 14 (Abst.)
beta-adrenergic receptor binding in lymphocytes from patients with, 20 (Abst.)
bronchial, differences in response to anti-IgE and to anti-IgG in basophils from patients with, 25 (Abst.)
Asthma—Cont'd
effect of vagolytic drugs on airway obstruction in, 19 (Abst.)
protective effects of Ketotifen in, 15 (Abst.)
responsiveness to histamine or methacholine in, measurement and clinical significance (Hargreave FE et al), 347 (Postgraduate course presentation)
role of IgE and IgE receptors in (Kulczycki A Jr), 5 (Postgraduate course presentation)
bronchodilator effects of clemastine, ipratropium bromide, and salbutamol in children with, 19 (Abst.)
in children, airway responsiveness to histamine as a test for overall severity of (Murray AB et al), 119
and chronic bronchitis, $PGF_{2\alpha}$ challenge test in, 1 (Abst.)
chronic stable, and normal arterial pressure of carbon dioxide in hypoxia, 2 (Abst.)
correlation between increased reactivity of bronchi and of mediator releasing cells in, 6 (Abst.)
cromolyn sodium in treatment of (Bernstein IL), 247 (Postgraduate course presentation)
exercise-induced, calcium antagonists in, 17 (Abst.)
partially inhibited by prazosin, an $alpha_1$-adrenoreceptor antagonist (Barnes PJ et al), 411
and hay fever, 1, 5, 11, 17, 25 (Absts.)
intrinsic and allergic, HLA-A, B, C, and D antigens in, 11 (Abst.)
meat wrapper's; identification of the causal agent, 12 (Abst.)
mold-induced (Salvaggio J, Aukrust L), 327 (Postgraduate course presentation)
occupational, secondary to inhalation of garlic dust (Falleroni AE et al), 156 (Brief communication)
Asthmatic patients, aspirin-sensitive, bronchospasm caused by intravenous hydrocortisone sodium succinate (Solu-Cortef) in (Dajani BM et al), 201
corticosteroid-dependent, allergic bronchopulmonary aspergillosis in (Basich JE et al), 98
Nigerian, high dose ascorbic acid in, 5 (Abst.)
and normal subjects, radioimmunoassay of thromboxane B_2 in plasma of, 4 (Abst.)
sensitivity to ingested metabisulfites in (Stevenson DD, Simon RA), 26
Atmospheric allergens, immunochemical method to measure (Agarwal MK et al), 194
Atopic allergy, serum IgE, and RAST specific IgE antibodies in cystic fibrosis, 19 (Abst.)
asthma, corticosteroid-sensitive lymphocytes are normal in (Schuyler MR et al), 72
dermatitis, abnormal suppressor cell function in, 26 (Abst.)
heterologous desensitization of leukocytes as a possible mechanism of beta adrenergic blockade in (Safko MJ et al), 218
Atopy does not predispose to RSV bronchiolitis or postbronchiolitic wheezing, 23 (Abst.)
Atropine and glycopyrrolate effects on lung mechanisms in normal man, 15 (Abst.)
Autoantibodies and immune complexes in silicosis (Doll NJ et al), 281

B

B cell(s), capacity to serve as antigen-presenting cells, 17 (Abst.)
/T cell ratio in normal human peripheral blood, circannual variations in (Bratescu A, Teodorescu M), 273
Baker's asthma, 1 (Abst.)
Bare lymphocyte syndrome, report on the registry, 21 (Abst.)
Bartter's syndrome and Neo-Mull-Soy metabolic alkalosis, 9 (Abst.)
Basophil(s) from patients with bronchial asthma, differences in response to anti-IgE and to anti-IgG in, 25 (Abst.)
"releasability" in asthma, 14 (Abst.)
Beta-adrenergic and alpha-adrenergic agonists and histamine interrelated in canine airways (Leff AR, Munoz NM), 300

Beta-adrenergic—Cont'd
blockade in atopic dermatitis, heterologous desensitization of leukocytes as a possible mechanism of (Safko MJ et al), 218
drug-induced, potentiated anaphylaxis in patients with (Jacobs RL et al), 125
receptor agonist, ability to inhibit antigen-induced contraction of guinea pig isolated airway smooth muscle blocked by parainfluenza 3 infection, 28 (Abst.)
binding in lymphocytes from patients with asthma, 20 (Abst.)
adrenoreceptor agonists in human bronchial smooth muscle, tachyphylaxis to, 9 (Abst.)
agonist–xanthine derivative (reproterol), inhibition of antigen-induced bronchoconstriction with, 15 (Abst.)
receptor agonists, desensitization of isolated human bronchial smooth muscle to (Avner BP, Jenne JW), 51
Beta-2 receptor agonist; metabolism and pharmacology (McFadden ER), 91 (Postgraduate course presentation)
Blockade, beta adrenergic, in atopic dermatitis, heterologous desensitization of leukocytes as a possible mechanism of (Safko MJ et al), 218
drug-induced, potentiated anaphylaxis in patients with (Jacobs RL et al), 125
Blood, normal human peripheral, circannual variations in B cell/T cell ratio in (Bratescu A, Teodorescu M), 273
Botulinal antitoxin, hypersensitivity reactions with, 12 (Abst.)
Bronchi and mediator releasing cells in asthma, correlation between increased reactivity of, 6 (Abst.)
Bronchial asthma, differences in response to anti-IgE and to anti-IgG in basophils from patients with, 25 (Abst.)
effect of vagolytic drugs on airway obstruction in, 19 (Abst.)
protective effect of Ketotifen in, 15 (Abst.)
role of IgE and IgE receptors in (Kulczycki A Jr), 5 (Postgraduate course presentation)
responses to $PGF_{2\alpha}$ and methacholine compared (Thomson NC et al), 392
responsiveness to histamine or methacholine in asthma; measurement and clinical significance (Hargreave FE et al), 347 (Postgraduate course presentation)
smooth muscle, human, isolated, desensitization to beta-receptor agonists (Avner BP, Jenne JW), 51
tachyphylaxis to beta-adrenoreceptor agonists in, 9 (Abst.)
Bronchiolitis, RSV, or postbronchiolitic wheezing, atopy does not predispose to, 23 (Abst.)
Bronchitis, chronic, and asthma, $PGF_{2\alpha}$ challenge test in, 1 (Abst.)
Bronchoconstriction, antigen-induced, inhibition with reproterol, a new beta agonist–xanthine derivative, 15 (Abst.)
inhibition by aerosols of prostaglandins E_1 and E_2, 10 (Abst.)
Bronchodilator effects of clemastine, ipratropium bromide, and salbutamol in children with asthma, 19 (Abst.)
Bronchopulmonary aspergillosis, allergic, in corticosteroid-dependent asthmatics (Basich JE et al), 98
with low serum IgE (Schwartz RH, Hollick GE), 290
Bronchospasm, antigen-induced, effect of inhaled lodoxamide tromethamine in prevention of (Ungerer RG et al), 471
cotton bract–induced, airway reactivity in, 29 (Abst.)
exercise-induced, effectiveness of terbutaline and theophylline alone and in combination in, 5 (Abst.)
caused by intravenous hydrocortisone sodium succinate (Solu-Cortef) in aspirin-sensitive asthmatics (Dajani BM et al), 201

C

Calcium antagonists in exercise-induced asthma, 17 (Abst.)
Canine airways, interrelationship between alpha- and beta-adrenergic agonists and histamine in (Leff AR, Munoz NM), 300
Carbenicillin and penicillin, desensitization of anaphylactic hypersensitivity specific for penicilloate minor determinant of (Gorevic PD, Levine BB), 267
Carbon dioxide, normal arterial pressure of in hypoxia, chronic stable asthma and, 2 (Abst.)
Cell-mediated immunity, role in Hymenoptera allergy (Case RL et al), 399
Cellular proliferative response and specific IgE antibody, effect of immunotherapy on; lymphocyte responsiveness to *Dermatophagoides farinae* extract in mite-sensitive patients (Hiratani M et al), 205
CFU-C/suppressor T cells, generation of, in vitro, an experimental model for immune-mediated marrow failure, 21 (Abst.)
Chemotactic defect, neutrophil, reversible by histamine H_2 receptor blockade, hyperimmunoglobulin E syndrome, 24 (Abst.)
Children, airway responsiveness to histamine as a test for overall severity of asthma in (Murray AB et al), 119
with asthma, bronchodilator effects of clemastine, ipratropium bromide, and salbutamol in, 19 (Abst.)
chronic cough in; manifestation of airway hyperreactivity, 2 (Abst.)
with frequent respiratory infections, immunocompetence of, 22 (Abst.)
nasal polyps in, 14 (Abst.)
on sustained-release therapy, monitoring by salivary theophylline levels, 9 (Abst.)
Cholinergic and aquagenic urticaria, evaluation of a patient with (Davis RS et al), 479
urticaria, cold-induced (Kaplan AP, Garofalo J), 438
and exercise-induced anaphylaxis (Kaplan AP et al), 319
Chronic bronchitis and asthma, $PGF_{2\alpha}$ challenge test in, 1 (Abst.)
cough in children; manifestation of airway hyperreactivity, 2 (Abst.)
urticaria, controlled trial of therapy in (Harvey RP et al), 262
induced by additives and food, in vitro stimulation of lymphocytes in, 18 (Abst.)
Ciliary beat frequency in human respiratory explants, 28 (Abst.)
Circannual variations in B cell/T cell ratio in normal human peripheral blood (Bratescu A, Teodorescu M), 273
Clemastine, ipratropium bromide, and salbutamol, bronchodilator effects in children with asthma, 19 (Abst.)
Cold-induced cholinergic urticaria (Kaplan AP, Garofalo J), 438

Colitis, ulcerative, and Crohn's disease, disodium cromoglycate in the treatment of, 23 (Abst.)
Complexes, immune, and autoantibodies in silicosis (Doll NJ et al), 281
Contact dermatitis caused by shoes, 8 (Abst.)
sensitivity, immunoregulation of, 8 (Abst.)
Corticosteroid-dependent asthmatics, allergic bronchopulmonary aspergillosis in (Basich JE et al), 98
-sensitive lymphocytes are normal in atopic asthma (Schuyler MR et al), 72
Cotton bract–induced bronchospasm, airway reactivity in, 29 (Abst.)
Cough, chronic, in children; manifestation of airway hyperreactivity, 2 (Abst.)
Crohn's disease and ulcerative colitis, disodium cromoglycate in the treatment of, 23 (Abst.)
Cromoglycate, disodium, in the treatment of ulcerative colitis and Crohn's disease, 23 (Abst.)
Cromolyn sodium, inhaled, IgE-mediated anaphylaxis with (Brown LA et al), 416
in treatment of asthma (Bernstein IL), 247 (Postgraduate course presentation)
Cyclic AMP, rat mast-cell, and mediator release, effects of histamine and PGD_2 on (Wescott S, Kaliner M), 383
Cystic fibrosis, atopic allergy, serum IgE, and RAST specific IgE antibodies in, 19 (Abst.)

D

Danazol-induced augmentation of serum alpha$_1$-antitrypsin levels in individuals with deficiency of this antiprotease, 13 (Abst.)
Dermatitis, atopic, abnormal suppressor cell function in, 26 (Abst.)
heterologous desensitization of leukocytes as a possible mechanism of beta adrenergic blockade in (Safko MJ et al), 218
contact, caused by shoes, 8 (Abst.)
Dermatographism, severe, histamine release and therapy of (Garofalo J, Kaplan KP), 103
Dermatophagoides farinae extract in mite-sensitive patients, lymphocyte responsiveness to; effect of immunotherapy on cellular proliferative response and specific IgE antibody (Hiratani M et al), 205
Desensitization of anaphylactic hypersensitivity specific for penicilloate minor determinant of penicillin and carbenicillin (Gorevic PD, Levine BB), 267
antigen-specific, in a rabbit model of acute hypersensitivity pneumonitis (Richerson HB et al), 226
of leukocytes, heterologous, possible mechanism of beta adrenergic blockade in atopic dermatitis (Safko MJ et al), 218
Diaphragm; two muscles, 29 (Abst.)
Diphragmatic contractility improved by aminophylline, 28 (Abst.)
Disodium cromoglycate in the treatment of ulcerative colitis and Crohn's disease, 23 (Abst.)
Down's syndrome, altered cellular immune functions in, 6 (Abst.)

E

Electrostimulation and venom sac extraction, comparison of vespid venoms collected by (Mueller U et al), 254
ELISA; *see* Enzyme-linked immunosorbent assay
Enzyme-linked immunosorbent assay, antibodies to *Aspergillus fumigatus* in farmer's lung patients measured by, 10 (Abst.)
for IgG antibodies against insect venoms (Grant JA et al), 112
Eosinophil(s) accumulation, in vivo, and histamine release in human allergic reactions, histamine suppression of (Ting S et al), 65
normal human, glucocorticoid receptors in; comparison with neutrophils (Peterson AP et al), 212
Erythromycin, effect on theophylline kinetics (Prince RA et al), 427
Exercise-induced anaphylaxis and cholinergic urticaria (Kaplan AP et al), 319
asthma, calcium antagonists in, 17 (Abst.)
partially inhibited by prazosin, an alpha$_1$-adrenoreceptor antagonist (Barnes PJ et al), 411
bronchospasm, effectiveness of terbutaline and theophylline alone and in combination in, 5 (Abst.)
urticaria, angioedema, and anaphylactoid episodes (Lewis J et al), 432

F

Farmer's lung, inhalation challenge and skin testing in (Edwards JH, Davis BH), 58
patients, measurement by enzyme-linked immunosorbent assay of antibodies to *Aspergillus fumigatus* in, 10 (Abst.)
Food(s) and additives, in vitro stimulation of lymphocytes in chronic urticaria induced by, 18 (Abst.)
allergy in fully breast-fed infants, 3 (Abst.)
vegetable, pollen, and Hymenoptera venom, IgE antibodies that crossreact with (Aalberse RC et al), 356

G

Garlic dust, occupational asthma secondary to inhalation of (Falleroni AE et al), 156 (Brief communication)
Glucocorticoid receptors in normal human eosinophils; comparison with neutrophils (Peterson AP et al), 212
Glutaraldehyde-modified, tyrosine-adsorbed short ragweed extract, clinical and immunologic evaluation of (Metzger WJ et al), 442
Glycopyrrolate and atropine effects on lung mechanisms in normal man, 15 (Abst.)
Guinea pig isolated airway smooth muscle, parainfluenza 3 infection blocks the ability of a beta adrenergic receptor agonist to inhibit antigen-induced contraction of, 28 (Abst.)

H

H-1 and H-2 histamine receptor antagonists, analysis of effects on cardiovascular and pulmonary responses; effects of infused histamine (Kaliner M et al), 365
H_2 receptor blockade, histamine, neutrophil chemotactic defect reversible by, hyperimmunoglobulin E syndrome, 24 (Abst.)
Hay fever and asthma, 1, 5, 11, 17, 25 (Absts.)
ragweed, efficacy and safety of long-term allergoid treatment of (Norman PS et al), 460
Heat urticaria, local, mediator release in (Atkins PC, Zweiman B), 286
Heterologous desensitization of leukocytes; possible mechanism of beta adrenergic blockade in atopic dermatitis (Safko MJ et al), 218
Histamine, airway responsiveness to as a test for overall severity of asthma in children (Murray AB et al), 119
and alpha- and beta-adrenergic agonists interrelated in canine airways (Leff AR, Munoz NM), 300
H_2 receptor blockade, neutrophil chemotactic defect reversible by, hyperimmunoglobulin E syndrome, 24 (Abst.)
infused, effects of; analysis of effects of H-1 and H-2 histamine receptor antagonists on cardiovascular and pulmonary responses (Kaliner M et al), 365
or methacholine in asthma, bronchial responsiveness to, measurement and clinical significance (Hargreave FE et al), 347 (Postgraduate course presentation)
and PGD_2, effects on rat mast-cell cyclic AMP and mediator release (Wescott S, Kaliner M), 383
receptor antagonists, H-1 and H-2, analysis of effects on cardiovascular and pulmonary responses; effects of infused histamine (Kaliner M et al), 365
release and in vivo eosinophil accumulation in human allergic reactions, histamine suppression of (Ting S et al), 65
and therapy of severe dermatographism (Garofalo J, Kaplan KP), 103
skin reactions, age, and total serum IgE correlated with allergen skin-test reactivity in a community population sample (Barbee RA et al), 15
suppression of in vivo eosinophil accumulation and histamine release in human allergic reactions (Ting S et al), 65
HLA-A, B, and C, and HLA-D antigens in intrinsic and allergic asthma, 11 (Abst.)
Human(s), age-related impairment of in vitro antibody response in, 6 (Abst.)
allergic reactions, histamine suppression of in vivo eosinophil accumulation and histamine release in (Ting S et al), 65
bronchial smooth muscle, isolated, desensitization to beta-receptor agonists (Avner BP, Jenne JW), 51
tachyphylaxis to beta-adrenoreceptor agonists in, 9 (Abst.)
eosinophils, normal, glucocorticoid receptors in; comparison with neutrophils (Peterson AP et al), 212
IgE, a U.S. reference for (Evans R III and Committee), 79 (Committee report)
induction of persistent tolerance to urushiol in (Epstein WL et al), 20

Human(s)—Cont'd
normal, atropine and glycopyrrolate effects on lung mechanisms in, 15 (Abst.)
peripheral blood, normal, circannual variations in B cell/T cell ratio in (Bratescu A, Teodorescu M), 273
respiratory explants, ciliary beat frequency in, 28 (Abst.)
seminal fluid, localized and systemic hypersensitivity to, 27 (Abst.)
Humidifier water or sewage flooding, hypersensitivity lung disease due to *Cephalosporium* in homes contaminated by (Patterson R et al), 128
Hydrocortisone sodium succinate (Solu-Cortef), intravenous, causing bronchospasm in aspirin-sensitive asthmatics (Dajani BM et al), 201
Hymenoptera allergy, role of cell-mediated immunity in (Case RL et al), 399
venom, vegetable foods, and pollen, IgE antibodies that crossreact with (Aalberse RC et al), 356
Hyperimmunoglobulin E syndrome; a neutrophil chemotactic defect reversible by histamine H_2 receptor blockade, 24 (Abst.)
Hyperreactivity, airway, manifestation of; chronic cough in children, 2 (Abst.)
Hypersensitivity, anaphylactic, specific for penicilloate minor determinant of penicillin and carbenicillin, desensitization of (Gorevic PD, Levine BB), 267
localized and systemic, to human seminal fluid, 27 (Abst.)
lung disease due to *Cephalosporium* in homes contaminated by sewage flooding or by humidifier water (Patterson R et al), 128
pneumonitis, acute, antigen-specific desensitization in a rabbit model of (Richerson HB et al), 226
caused by *Streptomyces albus* (Kagen SL et al), 295
pulmonary, and immunologic sensitization by repeated inhalation of aromatic isocyanates, 7 (Abst.)
reaction(s) with botulinal antitoxin, 12 (Abst.)
to kiwi fruit (Chinese gooseberry, *Actinidia chinensis*) (Fine AJ), 235
skin test reactivity, enhanced delayed, with serial testing in healthy volunteers, 7 (Abst.)
Hypoxia, normal arterial pressure of carbon dioxide in, chronic stable asthma and, 2 (Abst.)

I

Immune complexes and autoantibodies in silicosis (Doll NJ et al), 281
functions, altered cellular, in Down's syndrome, 6 (Abst.)
-mediated marrow failure, an experimental model for, generation of CFU-C/suppressor T cells in vitro, 21 (Abst.)
Immunity, cell-mediated, role in Hymenoptera allergy (Case RL et al), 399
Immunocompetence of children with frequent respiratory infections, 22 (Abst.)
Immunoglobulin(s) and antibodies, secretory, calculation of (Mathews KP), 46
E, allergic bronchopulmonary aspergillosis with (Schwartz RH, Hollick GE), 290
antibody(ies) and cellular proliferative response, effect of immunotherapy on; lymphocyte responsiveness to *Dermatophagoides farinae* extract in mite-sensitive patients (Hiratani M et al), 205
that crossreact with vegetable foods, pollen, and Hymenoptera venom (Aalberse RC et al), 356
RAST specific, atopic allergy, and serum IgE in cystic fibrosis, 19 (Abst.)
distribution in a community population sample; correlations with age, sex, and allergen skin-test reactivity (Barbee RA et al), 106
human, a U.S. reference for (Evans R III and Committee), 79 (Committee report)
Immunoglobulin E—Cont'd
and IgE receptors, role in bronchial asthma (Kulczycki A Jr), 5 (Postgraduate course presentation)
levels, serum, immediate skin tests, RAST and aging (Stoy PJ et al), 421
-mediated anaphylaxis with inhaled cromolyn sodium (Brown LA et al), 416
receptors and IgE, role in bronchial asthma (Kulczycki A Jr), 5 (Postgraduate course presentation)
responses, specific, in mice, inhibition by pre-exposure to inhaled antigen, 26 (Abst.)
serum, atopic allergy, and RAST specific antibodies in cystic fibrosis, 19 (Abst.)
total, age, and histamine skin reactions correlated with allergen skin-test reactivity in a community population sample (Barbee RA et al), 15
G antibodies against insect venoms, enzyme-linked immunosorbent assay for (Grant JA et al), 112
Immunologic reactivity and clinical sensitivity, lack of correlation between, prospective case study showing; insect venom allergy (Reisman RE et al), 406
sensitization and pulmonary hypersensitivity by repeated inhalation of aromatic isocyanates, 7 (Abst.)
Immunology, 3, 6, 17, 21, 26 (Absts.)
Immunoregulation of contact sensitivity, 8 (Abst.)
Immunosuppression and alterations of T-lymphocyte subpopulations after rubella vaccination, 3 (Abst.)
Immunotherapy, allergen, with modified allergens (Patterson R), 85 (Robert A. Cooke Memorial Lecture)
effect on cellular proliferative response and specific IgE antibody; lymphocyte responsiveness to *Dermatophagoides farinae* extract in mite-sensitive patients (Hiratani M et al), 205
local intranasal, for ragweed allergic rhinitis (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
Inhalation challenge and skin testing in farmer's lung (Edwards JH, Davis BH), 58
Injection therapy, Rinkel; a multicenter controlled study (Hirsch SR et al), 133
Insect venom(s) allergy, a prospective case study showing lack of correlation between immunologic reactivity and clinical sensitivity (Reisman RE et al), 406
enzyme-linked immunosorbent assay for IgG antibodies against (Grant JA et al), 112
Intranasal immunotherapy, local, for ragweed allergic rhinitis (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
Intrinsic and allergic asthma, HLA-A, B, C, and D antigens in, 11 (Abst.)
Ipratropium bromide, clemastine, and salbutamol, bronchodilator effects in children with asthma, 19 (Abst.)
Isocyanates, aromatic, immunologic sensitization and pulmonary hypersensitivity by repeated inhalation of, 7 (Abst.)

K

Ketotifen in bronchial asthma, protective effect of, 15 (Abst.)
Kiwi fruit, (Chinese gooseberry, *Actinidia chinensis*), hypersensitivity reaction to (Fine AJ), 235

L

Leukocytes, heterologous desensitization of, possible mechanism of beta adrenergic blockade in atopic dermatitis (Safko MJ et al), 218
Local intranasal immunotherapy for ragweed allergic rhinitis (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
Lodoxamide tromethamine, inhaled, effect in prevention of antigen-induced bronchospasm (Ungerer RG et al), 471

Lung disease, hypersensitivity, due to *Cephalosporium* in homes contaminated by sewage flooding or by humidifier water (Patterson R et al), 128
mechanisms in normal man, atropine and glycopyrrolate effects on, 15 (Abst.)
Lymphocyte(s) in chronic urticaria induced by additives and food, in vitro stimulation of, 18 (Abst.)
corticosteroid-sensitive, are normal in atopic asthma (Schuyler MR et al), 72
from patients with asthma, beta-adrenergic receptor binding in, 20 (Abst.)
responsiveness to *Dermatophagoides farinae* extract in mite-sensitive patients; effect of immunotherapy on cellular proliferative response and specific IgE antibody (Hiratani M et al), 205
syndrome, bare, report on the registry, 21 (Abst.)
T, subpopulations, immunosuppression and alterations of after rubella vaccination, 3 (Abst.)

M

Man; *see* Human
Marrow failure, immune-mediated, an experimental model for, generation of CFU-C/suppressor T cells in vitro, 21 (Abst.)
Mast-cell cyclic AMP, rat, and mediator release, effects of histamine and PGD_2 on (Wescott S, Kaliner M), 383
granules, effects of adrenocorticosteroids on late-phase inflammatory responses induced by; biologic activity of mast cell granules in rat skin (Oertel H, Kaliner M), 238
in rat skin, biologic activity of; effects of adrenocorticosteroids on late-phase inflammatory responses induced by mast cell granules (Oertel H, Kaliner M), 238
Meat wrapper's asthma; identification of the causal agent, 13 (Abst.)
Mediator release in local heat urticaria (Atkins PC, Zweiman B), 286
and rat mast-cell cyclic AMP, effects of histamine and PGD_2 on (Wescott S, Kaliner M), 383
releasing cells and bronchi in asthma, correlation between increased reactivity of, 6 (Abst.)
Metabisulfites, ingested, sensitivity in asthmatic subjects (Stevenson DD, Simon RA), 26
Metabolic alkalosis and Neo-Mull-Soy; a model of Bartter's syndrome, 9 (Abst.)
Methacholine or histamine in asthma, bronchial responsiveness to, measurement and clinical significance (Hargreave FE et al), 347 (Postgraduate course presentation)
and $PGF_{2\alpha}$, comparison of bronchial responses to (Thomson NC et al), 392
Mice, specific IgE responses in, inhibition by pre-exposure to inhaled antigen, 26 (Abst.)
Miscellaneous allergies, 3, 8, 12, 18, 22, 27 (Absts.)
Mite feces are major source of house dust allergens, 29 (Abst.)
-sensitive patients, lymphocyte responsiveness to *Dermatophagoides farinae* extract in; effect of immunotherapy on cellular proliferative response and specific IgE antibody (Hiratani M et al), 205
Mold-induced asthma (Salvaggio J, Aukrust L), 327 (Postgraduate course presentation)
Mucous secretions (Bookman R), 409; Reply (Nadel JA), 409 (Correspondence)
Murine antigens, allergy to, (Schumacher MJ et al), 310

N

Nasal polyps in children, 14 (Abst.)
Neo-Mull-Soy metabolic alkalosis; a model of Bartter's syndrome, 9 (Abst.)
Neutrophil(s) chemotactic defect reversible by histamine H_2 receptor blockade; hyperimmunoglobulin E syndrome, 24 (Abst.)
and normal human eosinophils compared, glucocorticoid receptors in (Peterson AP et al), 212
Nickel release from metallic buttons in blue jeans, 3 (Abst.)
Nigerian asthmatics, high dose ascorbic acid in, 5 (Abst.)
Nitroglycerin, sublingual, in acute asthma, airway response to, 20 (Abst.)

P

Parainfluenza 3 infection blocks the ability of a beta adrenergic receptor agonist to inhibit antigen-induced contraction of guinea pig isolated airway smooth muscle, 28 (Abst.)
Pathology, pharmacology, and physiology, 4, 9, 14, 19, 23, 28 (Absts.)
Peanut oil is not allergenic to peanut-sensitive individuals (Taylor SL et al), 372
products, allergenicity of, as determined by RAST inhibition (Nordlee JA et al), 376
-sensitive individuals, peanut oil is not allergenic to (Taylor SL et al), 372
Pediatrics, 3, 9, 14, 19, 22 (Absts.)
Penicillin allergy, skin testing for (Van Dellen), 169 (Editorial)
to detect (Sullivan TJ et al), 171
and carbenicillin, desensitization of anaphylactic hypersensitivity specific for penicilloate minor determinant of (Gorevic PD, Levine BB), 267
Penicilloate minor determinant of penicillin and carbenicillin, desensitization of anaphylactic hypersensitivity specific for (Gorevic PD, Levine BB), 267
Pharmacology, physiology, and pathology, 4, 9, 14, 19, 23, 28 (Absts.)
Physiology, pharmacology, and pathology, 4, 9, 14, 19, 23, 28 (Absts.)
Pneumonitis, hypersensitivity, acute, antigen-specific desensitization in a rabbit model of (Richerson HB et al), 226
caused by *Streptomyces albus* (Kagen SL et al), 295
Pollen allergoids, ragweed, preparation by aldehyde modification in two steps (Marsh DG et al), 449
antigens, blocking antibodies to, measurement by radiolabelled protein A from *Staphylococcus aureus*, 18 (Abst.)
vegetable foods, and Hymenoptera venom, IgE antibodies that crossreact with (Aalberse RC et al), 356
Polyps, nasal, in children, 14 (Abst.)
Postbronchiolitic wheezing or RSV bronchiolitis, atopy does not predispose to, 23 (Abst.)
Prazosin, an $alpha_1$-adrenoreceptor antagonist, partially inhibits exercise-induced asthma (Barnes PJ et al), 411
Presidential address, 1
Presidents of state, regional, and local allergy societies as of January 1981, 163
Prostaglandin(s) D_2 and histamine, effects on rat mast-cell cyclic AMP and mediator release (Wescott S, Kaliner M), 383
E_1 and E_2, inhibition of bronchoconstriction by aerosols of, 10 (Abst.)
$F_{2\alpha}$ challenge test in asthma and chronic bronchitis, 1 (Abst.)
and methacholine, comparison of bronchial responses to (Thomson NC et al), 392
Protein A from *Staphylococcus aureus*, radiolabelled, measurement of blocking antibodies to pollen antigens by, 18 (Abst.)
Pulmonary hypersensitivity and immunologic sensitization by repeated inhalation of aromatic isocyantes, 7 (Abst.)
Pyelography, retrograde, reactions to contrast material during, 13 (Abst.)

R

Rabbit, model of acute hypersensitivity pneumonitis, antigen-specific desensitization in (Richerson HB et al), 226

Radioallergosorbent test, immediate skin tests, serum IgE levels and aging (Stoy PJ et al), 421
inhibition, allergenicity of various peanut products as determined by (Nordlee JA et al), 376
specific antibodies, atopic allergy, and serum IgE in cystic fibrosis, 19 (Abst.)
Radioimmunoassay of thromboxane B^2 in plasma of normal and asthmatic subjects, 4 (Abst.)
Ragweed allergic rhinitis, local intranasal immunotherapy for (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
extract, short, glutaraldehyde-modified, tyrosine-adsorbed, clinical and immunologic evaluation of (Metzger WJ et al), 442
hay fever, efficacy and safety of long-term allergoid treatment of (Norman PS et al), 460
pollen allergoids, preparation by aldehyde modification in two steps (Marsh DG et al), 449
RAST; *see* Radioallergosorbent test
Rat mast-cell cyclic AMP and mediator release, effects of histamine and PGD_2 on (Wescott S, Kaliner M), 383
skin, biologic activity of mast cell granules in; effects of adrenocorticosteroids on late-phase inflammatory responses induced by mast cell granules (Oertel H, Kaliner M), 238
Reproterol, a new beta agonist–xanthine derivative, inhibition of antigen-induced bronchoconstriction with, 15 (Abst.)
Respiratory explants, human, ciliary beat frequency in, 28 (Abst.)
infections, frequent, immunocompetence of children with, 22 (Abst.)
Reviewer acknowledgment, 485
Rhinitis, ragweed allergic, local intranasal immunotherapy for (Nickelsen JA et al), I. Clinical response, 33; II. Immunologic response, 41
Rinkel injection therapy; a multicenter controlled study (Hirsch SR et al), 133
RSV bronchiolitis or postbronchiolitic wheezing, atopy does not predispose to, 23 (Abst.)
Rubella vaccination, immunosuppression and alterations of T-lymphocyte subpopulations after, 3 (Abst.)

S

Salbutamol, aminophylline, and combined intravenous infusions in acute severe asthma, 25 (Abst.)
clemastine, and ipratropium bromide, bronchodilator effects in children with asthma, 19 (Abst.)
Salivary theophylline levels, monitoring children on sustained-release therapy by, 9 (Abst.)
Schick test; useful tool for screening antibody deficiency, 27 (Abst.)
Seminal fluid, human, localized and systemic hypersensitivity to, 27 (Abst.)
Sensitization, immunologic, and pulmonary hypersensitivity by repeated inhalation of aromatic isocyanates, 7 (Abst.)
Sewage flooding or humidifier water, hypersensitivity lung disease due to *Cephalosporium* in homes contaminated by (Patterson R et al), 128
Shoe contact dermatitis, 8 (Abst.)
Silicosis, immune complexes and autoantibodies in (Doll NJ et al), 281
Skin prick tests, assessing the value of, 11 (Abst.)
test(s) to detect penicillin allergy (Sullivan TJ et al), 171
immediate, RAST, serum IgE levels and aging (Stoy PJ et al), 421
and inhalation challenge in farmer's lung (Edwards JH, Davis BH), 58
for penicillin allergy (Van Dellen), 169 (Editorial)
reactivity, allergen, in a community population sample; correlation with age, histamine skin reactions, and total serum IgE (Barbee RA et al), 15
Sodium cromolyn, in treatment of asthma (Bernstein IL), 247 (Postgraduate course presentation)
Solar urticaria, assessing the treatment of, dose-response as a quantifying approach, 22 (Abst.)
Solu-Cortef (hydrocortisone sodium succinate), intravenous, causing bronchospasm in aspirin-sensitive asthmatics (Dajani BM et al), 201
Stanozolol therapy for hereditary angioedema, clinical and biochemical effects of (Sheffer AL et al), 181
Staphylococcus aureus, measurement of blocking antibodies to pollen antigens by radiolabelled protein A from, 18 (Abst.)
Stingose, treatment for bites and stings, 13 (Abst.)
Stings and bites treated with Stingose, 13 (Abst.)
Streptomyces albus; new cause of hypersensitivity pneumonitis (Kagen SL et al), 295
Sublingual nitroglycerin in acute asthma, airway response to, 20 (Abst.)
Suppressor cell function, abnormal, in atopic dermatitis, 26 (Abst.)
T cells, CFU-C/, generation of, in vitro, an experimental model for immune-mediated marrow failure, 21 (Abst.)

T

T cells, CFU-C/suppressor, generation of, in vitro, an experimental model for immune-mediated marrow failure, 21 (Abst.)
-lymphocyte subpopulations, immunosuppression and alterations of after rubella vaccination, 3 (Abst.)
Tachyphylaxis to beta-adrenoreceptor agonists in human bronchial smooth muscle, 9 (Abst.)
Terbutaline and theophylline, effectiveness alone and in combination in exercise-induced bronchospasm, 5 (Abst.)
Theophylline kinetics, effect of erythromycin on (Prince RA et al), 427
levels, salivary, monitoring children on sustained-release therapy by, 9 (Abst.)
and terbutaline, effectiveness alone and in combination in exercise-induced bronchospasm, 5 (Abst.)
Thromboxane B^2, in plasma of normal and asthmatic subjects, radioimmunoassay of, 4 (Abst.)
Trimellitic anhydride airway syndromes, clinical and immunologic correlations in (Sale SR et al), 188
Tyrosine-adsorbed, glutaraldehyde-modified short ragweed extract, clinical and immunologic evaluation of (Metzger WJ et al), 442

U

Ulcerative colitis and Crohn's disease, disodium cromoglycate in the treatment of, 23 (Abst.)
Urticaria and angioedema, and anaphylactoid episodes, exercise-induced (Lewis J et al), 432
severe attacks caused by aromatic plants, 8 (Abst.)
aquagenic and cholinergic, evaluation of a patient with (Davis RS et al), 479
cholinergic, and exercise-induced anaphylaxis (Kaplan AP et al), 319
chronic, controlled trial of therapy in (Harvey RP et al), 262
induced by additives and food, in vitro stimulation of lymphocytes in, 18 (Abst.)
cold-induced cholinergic (Kaplan AP, Garofalo J), 438
heat, local, mediator release in (Atkins PC, Zweiman B), 286
solar, assessing the treatment of; the dose-response as a quantifying approach, (Abst.)
Urushiol, induction of persistent tolerance to in humans (Epstein WL et al), 20

V

Vagolytic drugs, effect on airway obstruction in bronchial asthma, 19 (Abst.)
Vegetable foods, pollen, and Hymenoptera venom, IgE antibodies that crossreact with (Aalberse RC et al), 356

Venom(s) allergy, insect; a prosective case study showing lack of correlation between immunologic reactivity and clinical sensitivity (Reisman RE et al), 406
Hymenoptera, vegetable foods, and pollen, IgE antibodies that crossreact with (Aalberse RC et al), 356
insect, enzyme-linked immunosorbent assay for IgG antibodies against (Grant JA et al), 112
vespid, collected by electrostimulation and by venom sac extraction compared (Mueller U et al), 254
sac extraction and electrostimulation, comparison of vespid venoms collected by (Mueller U et al), 254
Vespid venoms collected by electrostimulation and by venom sac extraction compared (Mueller U et al), 254

W

Wheezing, postbronchiolitic, or RSV bronchiolitis, atopy does not predispose to, 23 (Abst.)

X

Xanthine–beta agonist derivative (reproterol), inhibition of antigen-induced bronchoconstriction with, 15 (Abst.)
